-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-4 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

3. Claim 5 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 2, 3, and 6 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

4. Claim 6 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 4 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

5. Claim 7 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 5 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

6. Claim 8 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 7 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

7. Claim 9 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 8 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

8. Claims 10, 13, 14, and 15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 9 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

Art Unit: 2856

9. Claim 11 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 10 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

10. Claim 12 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 11 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

11. Claim 16 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 12-14 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

12. Claim 17 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 15 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

13. Claim 18 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 16 of prior U.S. Patent No. 6,598,459. This is a double patenting rejection.

Response to Arguments

1. Applicant's arguments filed 29 July 2004 have been fully considered but they are not persuasive. The applicant primary argument is that the patent office made an error in issuing the 6,598,459 patent. The applicant states that the file had to be reconstructed after it was used and it was issued with the wrong claims. Though this may be the case, upon examination of the parent file for the 6,598,459 patent, which was issued in July of 2003, there is no indication of the applicant filing any certificate of correction or requesting any re-exam of the application. With this in mind, it is the stance of the Patent Office that the 6,598,459 patent, as published, is a valid patent and therefore the claims as published are correct since the applicant has had substantial time which to seek a correction. For at least this reason, the examiner feels the double patenting rejection is valid.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
